

# Backup for ISA Server

Sales Datasheet

## Backup for ISA Server

Includes support for  
Websense Enterprise  
& Web Security Suite  
on ISA Server!

### Feature highlights...

#### Backups include:

- ✓ ISA Server/Array configuration
- ✓ ISA Enterprise configuration
- ✓ Firewall & Web Proxy logs
- ✓ Websense configuration

#### Scheduled ISA Backups

- ✓ Daily
- ✓ Weekly
- ✓ Monthly
- ✓ On request

#### Easy to use

- ✓ Wizard driven
- ✓ Simple scheduling
- ✓ Point and click
- ✓ Quick restore
- ✓ No system downtime
- ✓ Backup to a single file
- ✓ Over 95% compression

#### Compliance

- ✓ Off box storage
- ✓ Multiple backups
- ✓ Password protected
- ✓ 256bit AES encryption
- ✓ VeriTest tested for ISA Server

### How secure is your ISA Server?

Until now there has been no real way of fully backing up your ISA Server deployments. Some may think that restarting servers, manual exports and custom scripting is the solution. However, many hours will be spent re-installing, importing settings, re-configuring and tweaking – but inevitably losing log data. The result is loss of data and productivity due to system down time.

Restores may not work as expected and even more time will be lost as everything is rebuilt from scratch.

Now you can backup on the fly and restore again in minutes!

### The Solution

Driven by a point and click Wizard, backing up your ISA and Websense configuration, including Log files, could not be simpler. Backups are scheduled and automated to suit the needs of your organisation. In addition, the “online backup” backup technology incurs no system down time.

Compliance issues become yesterday's concern and all Disaster Recovery questions are answered. Backup archives can be saved locally, direct to a shared network device, or off site for remote storage. Backups are output as a single encrypted file, for high security, and over 95% compressed so that multiple backups are stored using the smallest amount of disk space.

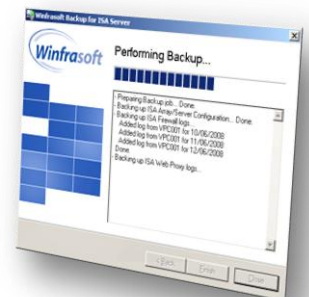

The regular backup can include - ISA Server/Array configuration, ISA Enterprise configuration, Firewall & Web Proxy logs and additionally the Websense configuration.

This is the ideal solution for ISA Server migrations or for upgrading to the latest ISA appliance platform.

Winfrasoft Backup for ISA Server is the only solution that gives you compete DR compliance and peace of mind for all your ISA Server deployments.
